Adhik Chintalwar

Software Engineer | AI engineering and full-stack development | Atlanta, GA
adhikchintalwar550@gmail.com | github.com/AdhikChintalwar | adhikchintalwar.github.io/adhik-portfolio

PROFESSIONAL SUMMARY

Software Engineer at Agilysys with an M.S. in Computer Science. Builds internal full-stack tools (React, .NET) and AI-enabled integrations (FastAPI, MCP, LangGraph), and supports Property Management System customers. Personal projects include a multi-tenant SaaS platform, an equity research system, a local voice assistant and an iPhone-to-Mac remote.

TECHNICAL SKILLS

Languages and data: Java, Python, TypeScript, JavaScript, SQL, SQL Server, SQLite
Front end: React, Angular, Vite, HTML, CSS
Back end and APIs: .NET, Node.js, Express, FastAPI, REST APIs, WebSockets, JWT authentication
AI and integration: LangGraph, Model Context Protocol (MCP), LLM tool calling, Ollama, OpenWakeWord, SenseVoice, asyncio
Cloud and DevOps: AWS, Azure App Service, Azure Container Registry, Firebase, Cloudflare, Docker, GitHub Actions CI/CD
Enterprise support: PMS customer support, incident investigation, log analysis, data synchronization, third-party integrations

PROFESSIONAL EXPERIENCE

Agilysys | Software Engineer March 2025 – Present
Atlanta, GA · Full-time

- Onboarding Tool: Developed an internal full-stack onboarding application using React and .NET, owning frontend, backend, and API integration work.
- Implemented master-data entry and management workflows and REST API-based migration into Agilysys software.
- OrchestrAI: Developed MCP integrations, integration logic, and FastAPI endpoints for an AI-enabled internal enterprise integration platform.
- Contributed API and tool functionality supporting chatbot-initiated workflows orchestrated through LangGraph across Agilysys and third-party systems.
- Provide technical support for Agilysys Property Management System (PMS) customers, investigating production incidents, software configuration, and operational issues.
- Troubleshoot SQL/database issues, API failures, application logs, data synchronization, and third-party integration problems; collaborate on resolution and escalation.

PERSONAL PROJECTS

MediCoreRx – pharma wholesale and ordering SaaS | *React, TypeScript, Node.js, Express, SQL Server, Azure*

- Designed and implemented a TypeScript monorepo of four web apps (admin ERP, customer ordering, platform operations, marketing) and two Express APIs on SQL Server, with organisation-scoped multi-tenancy, JWT auth and Firebase identity.
- Built an inventory engine with batch tracking, FIFO deduction and sale returns; deployed Dockerized APIs on Azure App Service and web apps on Firebase Hosting with GitHub Actions CI/CD.

Baby Equity Research – equity research platform | *Python, FastAPI, React, SQLite, Alpaca paper API*

- Built an end-to-end research system (React, FastAPI) that scans a stock universe, assembles multi-source evidence and produces a deterministic score, trade plan and risk gate.
- Kept model authority at zero over score, price levels and order entry: the model explains the research, Python engines own the math, and a person confirms any Alpaca paper order.

Baby Voice Assistant – local macOS voice assistant | *Python, Ollama, OpenWakeWord, SenseVoice, MCP, asyncio*

- Built an assistant that detects a wake word, transcribes speech offline and routes requests to specialist agents that run desktop, browser and workspace tools through a typed tool registry and MCP.
- Added a local privacy gate that redacts or blocks secrets and personal data before any cloud model, and ran scheduled automations on a background asyncio loop.

Mac Remote – iPhone-to-Mac remote control | *Python, FastAPI, WebSockets, PyObjC, Quartz*

- Built a Safari-based remote with no phone app: touch gestures stream over WebSockets to a Python server that injects mouse, keyboard, scroll and media-key events through macOS Quartz.
- Built a 120 Hz multi-monitor cursor overlay and secured control with a persisted pairing token (constant-time check).

EDUCATION

University of Alabama at Birmingham | M.S. Computer Science Jun 2023 – Dec 2024
SRM University, Chennai, India | Bachelor of Technology Jun 2019 – Jun 2023
