Adhik Chintalwar | Software Engineer
Atlanta, GA | adhikchintalwar550@gmail.com | +1 205-585-5829

---

SUMMARY

• Software Engineer with 2+ years of experience delivering secure, scalable full-stack web applications using Java, Angular, and RESTful APIs in enterprise environments supporting wealth, retail, and regulated business platforms.
• Strong hands-on experience owning features end-to-end from design through deployment, contributing to predictable, high-quality delivery through engineering best practices, automation, and Agile Scrum execution.
• Proven ability to build cloud-native applications on AWS and Azure, integrating CI/CD pipelines, automated testing, and observability to support high-availability, client-facing financial systems.
• Experienced in mentoring peers, improving code quality, performance tuning, and collaborating with cross-functional business and technology stakeholders to deliver measurable business outcomes.
• Detail-oriented engineer with a customer-first mindset, focused on usability, security, and reliability in fast-paced, multi-project environments.

---

SKILLS SUMMARY

Programming Languages: Java, C#, JavaScript, TypeScript, SQL, JSON, XML
Backend Technologies: Java RESTful APIs, .NET Core, ASP.NET Core, Microservices, Object-Oriented Design, Design Patterns
Frontend Technologies: Angular (14+), TypeScript, HTML5, CSS3, Bootstrap, Single Page Applications
Build & CI/CD: Maven, Gradle, GitHub, GitHub Actions, Bitbucket, Jenkins, Azure DevOps
Cloud & Platforms: AWS, Azure, Cloud-Native Architecture, Containerized Deployments
Testing & Quality: Unit Testing, TDD, xUnit, Jasmine, Karma, Postman, Automated Regression Testing
Security & Monitoring: OAuth2, JWT, Application Security Scanning, Splunk Logging & Alerts, Production Support
Agile & Collaboration: Git, Scrum, Jira, Confluence, Cross-Functional Delivery

---

EXPERIENCE

Software Engineer – Agilysys | Atlanta, GA
Apr 2025 – Present

• Built  end-to-end feature development for enterprise SaaS hospitality platforms, delivering scalable web and backend solutions supporting 15+ products while improving release predictability and platform stability.
• Designed and implemented Java and .NET-based RESTful APIs enabling transactional workflows, achieving 30% improvement in service reliability across POS and PMS integrations.
• Developed Angular and TypeScript single page application features, improving usability and reducing user-reported issues by 25% through clean UI patterns and performance optimizations.
• Implemented CI/CD pipelines using GitHub and GitHub Actions, automating builds, tests, and deployments to reduce manual release effort by 50%.
• Applied TDD and automated regression testing practices, increasing test coverage to 90%+ and reducing post-release defects by 35%.
• Tuned application and database performance, reducing API response times by 25% during peak transaction periods through query optimization and code refactoring.
• Integrated structured logging and Splunk-based monitoring, improving production issue detection and reducing mean time to resolution by 40%.
• Collaborated with product owners, QA, and operations teams in Scrum ceremonies, ensuring high-quality delivery aligned with evolving business priorities.
• Supported production and operations workflows, resolving live issues independently while maintaining service availability above 99.9%.
• Mentored junior engineers on coding standards, testing strategies, and Agile best practices, improving team delivery efficiency and code quality.

---

Associate Software Engineer – Walmart | Bentonville, AR
May 2024 – Dec 2024

• Delivered full-stack features for a large-scale e-commerce platform using Java, Angular, and REST APIs, supporting millions of users and improving checkout efficiency by 20%.
• Built and enhanced Angular single page applications with TypeScript, HTML5, and CSS, reducing front-end defects by 25% through reusable components and strict typing.
• Designed backend services using Java and .NET Core microservices, improving API responsiveness by 40% under high-traffic conditions.
• Integrated CI/CD pipelines with GitHub Actions and Jenkins, reducing deployment times by 50% and enabling frequent, reliable releases.
• Applied Agile Scrum practices across multiple concurrent projects, consistently meeting sprint commitments in a fast-paced environment.
• Implemented automated API and UI testing, achieving 95% endpoint validation coverage and lowering regression issues in production.
• Optimized database access patterns, improving transaction processing consistency and reducing backend latency by 30%.
• Leveraged cloud services on Azure to support scalable, highly available web applications with 99.9% uptime.
• Used Git extensively for source control, code reviews, and collaborative development across distributed teams.
• Partnered with business and technical stakeholders to translate requirements into scalable, maintainable software solutions.

---

Software Engineer – Cigna HealthCare (via Tectoro Consulting) | Hyderabad, India
Jan 2022 – Jun 2023
• Developed full-stack healthcare web applications using Java, Angular, and RESTful APIs, supporting secure, compliant systems across five healthcare facilities.
• Built Angular-based single page applications, increasing user engagement by 50% and reducing navigation errors by 40% through improved UI design.
• Designed backend microservices and data pipelines, improving processing efficiency by 40% while supporting regulated healthcare workflows.
• Implemented CI/CD pipelines and Git-based workflows, reducing deployment cycles by 30% and improving release reliability.
• Applied unit testing and TDD practices, achieving 95% test coverage and improving system stability in production environments.
• Tuned application and database performance, improving query response times by over 50% for reporting and analytics features.
• Deployed cloud-native applications on Azure, maintaining 99.95% uptime while supporting growing user demand.
• Integrated structured logging and Splunk monitoring, reducing production incident resolution time by 35%.
• Supported production operations, troubleshooting issues independently and collaborating with cross-functional teams to restore services quickly.
• Contributed actively in Scrum teams, influencing quality, efficiency, and delivery effectiveness across multiple enterprise projects.

---

EDUCATION
University of Alabama at Birmingham, Birmingham, AL
M.S. Computer Science | Jun 2023 – Dec 2024
SRM University, Chennai, India
Bachelor of Technology | Jun 2019 – Jun 2023

---

CERTIFICATIONS
• Oracle Certified Professional – Java SE
• AWS Certified Developer – Associate
